To Whom It May Concern,

2/4/01

My name is Naomi Warner, and I am a student in New York State. I am writing to you today to ask that you grant petition number 98P-0151/CPI, which would prohibit the slaughter of downed animals.

No animal should suffer needlessly, and downed animals suffer greatly each day. As you know, downed animals are animals that are too sick, or hurt to move on their own. They either lay discarded in the dead piles, to die slowly and painfully, or they are cruelly dragged to the truck that will transport them to slaughter.

Both of the practices mentioned above are barbaric and cruel, and must be stopped. Animals who are too hurt or sick to move on their own, should either be taken to a veterinarian to be cared for, or be humanely euthenized. By passing petition number 98P-0151/CPI you will be helping to end the torture of innocent animals who deserve better lives and more peaceful, painless deaths. Please pass the petition; it is the compassionate thing to do.

Thank you for your time.

Sincerely,

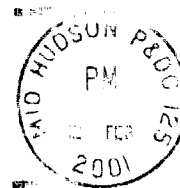

*Naomi Warner*
